Dear Kevin Rougeux,

Due to the generosity of Aegis living, the people of KOUMA KONDA have found a great relief and a comfort through the project “Toilet Facility in Kouma Konda”. Your donations have made it possible to build a public toilet (VIP) four cabins with alternate pits that open new perspectives for the community of KOUMA KONDA. For several years, this community defecated, for the most part, outdoors, near their living spaces and water points, which was source of insalubrity and sickness, but with your help, this will be a new beginning for them. Through this project, several families will no longer suffer from the problems associated with outdoor defecation and even better, they will benefit from the use of this organic waste in natural fertilizer for the farm.

As young entrepreneurs and recent graduates who fell in the unreliable work field of Togo, this project was a tremendous help. In the current socio-economic context of unemployment in Togo, this project has brought together a team of eight people who have agreed to a day-to-day effort for the implementation and rapid completion of the project. All this would not be accomplished without your support. We hope that our work has pleased you and hope to collaborate with you in the future to provide adapted and innovative solutions to populations in need. On behalf of TELOF-BTP, we would like to thank Aegis Living for the generous donation. You gave us job and hope.

Sincerely,

Prefils N’doda
Director of TELOF-BTP
